

WELCOME TO THE YELLOW WORLD!

FANUC ROBOTICS TRAINING – INCREASE YOUR CAPABILITIES

Whether you have just purchased a FANUC Robot and need some initial training or you already have skills in robotics and simply want to increase your capabilities, FANUC Robotics training programs offer a variety of courses to meet your requirements.

THIS IS HOW YOU PROFIT FROM FANUC ROBOTICS TRAINING:

- **Increased productivity and a longer machine life**

Well trained employees are able to configure systems more efficiently, giving optimised performance, higher productivity and a longer machine life.

- **Protection against downtime**

Training is the most important measure for keeping the risk of production downtime, caused by operating errors, as low as possible. And should something happen your trained team will be able to find and correct the malfunction easier and faster.

- **Faster conversion**

The FANUC Robotics training programme helps you quickly adapt new robot programmes each time your production changes.

- **Greater motivation**

Employees mastering the technology are confident and enjoy working with robots – your benefit: a motivated team!

THIS IS WHAT YOU CAN EXPECT FROM FANUC ROBOTICS TRAINING COURSES

WE HAVE 8 TRAINING FACILITIES LOCATED IN EUROPE WITH MODERN AND WELL EQUIPPED DEMONSTRATION AREAS AND LABORATORIES DESIGNED TO MEET YOUR NEEDS. FANUC ROBOTICS TRAINERS ARE HIGHLY EXPERIENCED AND DEDICATED TO ENSURING THAT YOU RECEIVE THE BEST POSSIBLE TRAINING COURSE. GIVING YOU THE GREATEST BENEFITS POSSIBLE!

In order to achieve optimal results, we offer:

- Optimised classrooms
- Robot demonstration centres and laboratories
- Effective training courses conducted in a manner and an environment conducive to learning
- Only trainers who are experts in their fields
- A limited number of participants in each session to help trainees get the maximum amount of information and dedication from the instructor
- All training courses in local language – they can be held either at FANUC Robotics facilities or at yours

This is what the participants in a FANUC Training Course can expect:

- We ask trainees to be dedicated only to FANUC Robotics training for the duration of the training period (e.g. no ringing mobile phones)
- Trainee to robot and trainee to instructor ratios are kept low
- Trainees receive all necessary materials and tools for use during their training
- Trainees have access to robot laboratories for hands on training
- Reference and training documentation are also included as part of the training fee
- Trainees are requested to complete an evaluation sheet after every course, which we use to improve our courses

Upon completion of the course, trainees receive all training-related documents as well as a certificate of their attendance.

SUITING EVERY NEED

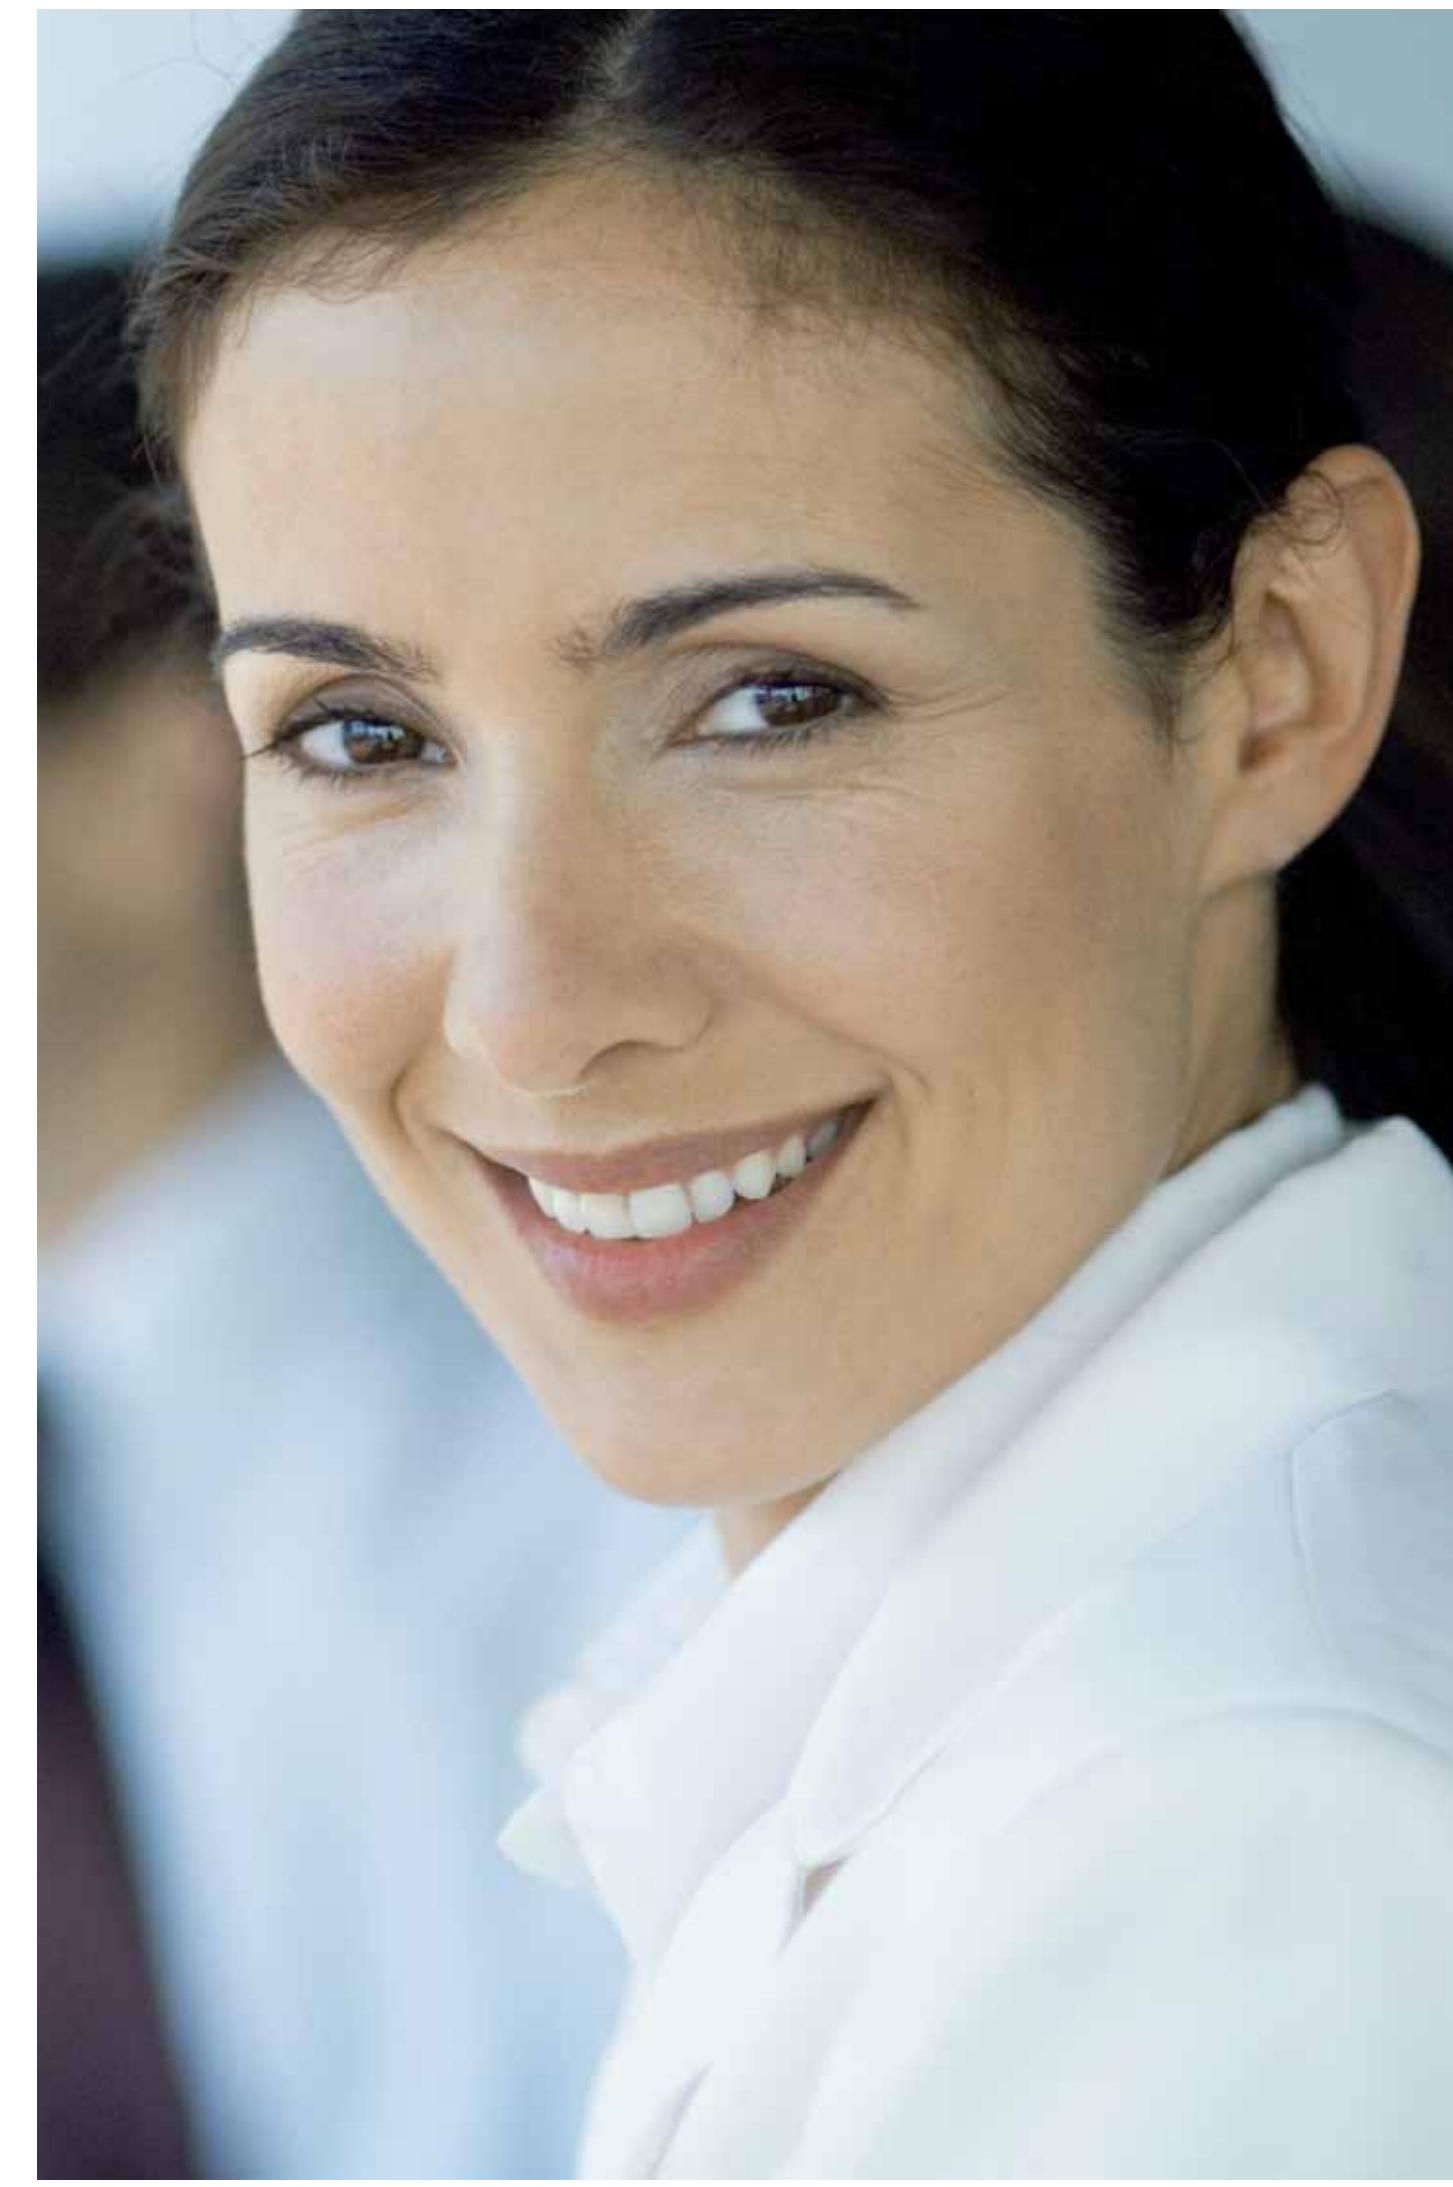

FANUC ROBOTICS TRAINING OFFERS A WIDE RANGE OF STANDARD TRAINING COURSES DEPENDING ON YOUR INSTALLATION, ROBOT TYPE AND CONTROLLER FROM ELECTRICAL AND MECHANICAL MAINTENANCE TO APPLICATION TOOL PROGRAMMING – SO MAKE YOUR CHOICE!

Some of the most popular courses are:

- Teach Pendant operating and programming
- KAREL programming
- Offline programming (ROBOGUIDE)
- Electrical and mechanical trouble shooting
- Application tools programming for generic applications such as arc or spot welding, handling, palletizing, sealing, painting etc.
- Communication tools (Profibus, Interbus etc.)
- Vision systems
- Other options (line tracking etc.)
- Automotive-specific applications

WE LOOK FORWARD TO DISCUSSING YOUR REQUIREMENTS WITH YOU!
